Bheema Nitish Guru Datha

B.Tech - (2023-27) +91-7780124320
Computer Science Engineering nitishbheema@gmail.com
Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology linkedin

Summary

Computer Science Engineering student with foundational knowledge in Java, C, SQL, data structures, and object-oriented programming. Hands-on experience in developing database-driven applications through academic projects and virtual engineering simulations. Strong problem-solving and analytical skills with an interest in software development and a willingness to learn and adapt to new technologies.

Education

- **Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology** — *Avadi, Tamil Nadu*
  Bachelor of Technology in Computer Science and Engineering | CGPA: 8.54 — Aug. 2023 – May. 2027
- **APBIE Board** — *Andhra Pradesh, India*
  Senior Secondary Education | Percentage: 84.6% — Jun. 2021 – Mar. 2023
- **SSC Board** — *Andhra Pradesh, India*
  Secondary Education | Percentage: 99.3% — Jun. 2020 – Mar. 2021

Technical Skills

- **Programming**: Java, C, SQL
- **Development**: HTML, CSS
- **Databases**: MySQL, Firebase, SQL Joins, Subqueries
- **CS Fundamentals**: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Projects

- **Finlytics – Personal Finance & Expense Tracker Web Application** — *Mar. 2026 – Apr. 2026*
  Web Development — Github
  – Developed a personal finance and expense tracking web application.
  – Implemented expense categorization and transaction management features.
  – Designed a MySQL database for storing user and financial records.

- **AI-Based RFID Smart Kitchen Management System** — *Dec. 2025 – May. 2026*
  IoT & Web Development — Github
  – Developed an RFID-based smart kitchen management system for ingredient tracking.
  – Integrated RFID with database synchronization for inventory monitoring.
  – Built a web dashboard to monitor stock and usage information.

- **PhishSense – AI-Driven Behavioral Phishing Detection & Threat Intelligence** — *2026*
  Cybersecurity & AI Research Project — Github
  – Developed a domain-independent phishing detection platform analyzing URLs, QR codes, webpages, and behavioral patterns.
  – Implemented behavioral fingerprinting, trusted-domain verification, risk scoring, and adaptive threat analysis.
  – Used Python-based AI/ML processing to analyze phishing-related features and support risk classification.
  – Integrated threat intelligence to maintain reusable phishing indicators and tamper-evident threat records.

Certifications

- **Salesforce**, Trailhead Modules — *Dec. 2025 - May. 2026*
- **Cisco**, CCNA: Introduction to Networks — *Apr. 2025*
- **IBM**, IBM z/OS Mainframe Practitioner — *Apr. 2026*
- **Forage**, JPMorganChase Software Engineering Job Simulation — *May. 2026*
